## Product Highlight

### GemOro UltraSpa, the Only Combination Steamer and Ultrasonic Bath

Professional quality device gets jewellery as clean as it can get by using a combination of 2-stage ultrasonic action at 42,000 pulses per second, plus hot steam.

Ultrasonic uses about .47L ordinary water and cleaning solution, steamer ordinary water.

- Ultrasonic includes stainless steel basket and cover with bright blue LED tank illumination
- Digital control panel provides an ultrasonic cleaning cycle of 6 minutes
- Steam cleaner safely generates high pressure up to 50 PSI using regular tap water
- Ideal size for retail jewelers with .9L steamer tank capacity
- Easy to use button controls activate steam on demand
- INCLUDES: Plastic coated stainless steel jewelry holding tweezers; stainless steel handheld mini-basket with handle for holding diamond ear studs, etc.; and water funnel with measuring fill cup
- Made of durable, long-life ABS
- Built-in Easy-Lift(tm) handles for moving
- 110-120V 60Hz, requires transformer for 220V systems
