

Cool Toolz

Supplying India with the best jewellery making tools from around the world

Product Highlight

3M Radial Bristle Wheels

Abrasive discs developed by 3M especially for jewellers. Each flexible plastic disc is colour-coded to indicate the specific grit. No compound is necessary, grit is uniformly dispersed throughout the disc. You work faster and clean-up is much easier!

Use for cleaning, pre-polishing, blending and removing scratches and firescale. Excellent for gold, silver, copper, pewter and brass. Discs can be used from a 3 wheel-stack for accessing tiny or hard-to-reach areas up to six wheels to polish larger surface areas.

Two diameters to choose from: 9/16" and 3/4"

Color	Grit	Application
Yellow	80	Removal of scratches and firescale
White	120	Texturing, light cleaning
Red	220	Removal of light scratches and oxides
Blue	400	Blending, pre-polishing
Pink	Pumice	Very light cleaning, pre-polishing
Peach	6 micron	Polishing
Light Green	1 micron	Polishing

Sold in 12-piece packages with mounting mandrel.
